**PH/036 Pest Measures**

This instrument amends the retained Implementing Regulation (EU) 2019/2072 ("the Phytosanitary Conditions Regulation") pursuant to the European Union (Withdrawal) Act 2018 and the European Union (Withdrawal Agreement) Act 2020. It will introduce measures on pests *Scolytus morawitzi* and *Polygraphus proximus* in England, Scotland and Wales (Great Britain) against the import of host plants and other relevant regulated goods. Imports of these high-risk plant goods will only be permitted under certain conditions. It will also modify existing measures against certain pests, firstly *Liriomyza huidobrensis* and *Liriomyza tifolii*, by adding an additional option for host plants destined for final users, and *Cronartium* species, by excluding pest free countries from the requirements. In addition, it regulates *Thaumetopoea processionea* as a pest known to occur across Great Britain and adds the leek as a host plant of Leek yellow stripe virus. This instrument will also alter the regulatory status of other pests: *Aonidiella orientalis* (a provisional quarantine pest), *Diaporthe caulivora* (a regulated non-quarantine pest "RNQP") and *Heterodera fici* (a RNQP) will be deregulated; The GB provisional quarantine pests *Eotetranychus sexmaculatus* and *Platypus apicalis* will be listed instead as GB quarantine pests (under official control); *Pseudomonas avellanae*, *Meloidogyne arenaria*, *Meloidogyne javanica*, and *Xiphinema index* (GB RNQPs) will be added to the GB provisional quarantine pest list (action taken on a provisional basis); Unregulated pests *Meloidogyne enterolobii*, *Agrilus horni*, Chilli veinal mottle virus, *Chrysobothris femorata* and *Lycorma delicatula* will be added to the GB provisional quarantine pest list.

**Labeling of Meat or Poultry Products Comprised of or Containing Cultured Animal Cells**

Advance notice of proposed rulemaking - The Food Safety and Inspection Service (FSIS) is publishing this advance notice of proposed rulemaking (ANPR) to request comments pertaining to the labeling of meat and poultry products comprised of or containing cultured cells derived from animals subject to the Federal Meat Inspection Act or the Poultry Products Inspection Act. Issues raised in the comments submitted in response to this ANPR will inform future rulemaking to establish labeling requirements for these products. This ANPR also discusses how FSIS will generally evaluate labels for these products if they are submitted before the Agency completes rulemaking. Cross-notified with TBT/N/USA/1772.

**United Arab Emirates is imposing a temporary ban on the importation of domestic and wild birds and their untreated by-products from Belgium**

Following the notification published by the World Organization for Animal Health (OIE) regarding the outbreak of Highly Pathogenic Avian Influenza virus (HPAI) in West Flanders in Belgium, the United Arab Emirates is applying a precautionary sanitary measure to prevent the risk of introducing HPAI virus through the imports of live birds and their products from West Flanders in Belgium. These measures include: 1) Temporary ban on the importation of domestic and wild birds and their untreated by-products and day-old chicks and hatching eggs from Belgium to the United Arab Emirates; 2) Temporary ban on the importation of poultry meat and table eggs and their non-heat treated products from West Flanders in Belgium to the United Arab Emirates; 3) Consignments of table eggs and poultry meat and their products from West Flanders in Belgium that were produced after 9 August 2021 are not allowed to be exported to the United Arab Emirates; 4) Consignments of poultry meat and table eggs and their non-heat treated products from non infected province in Belgium will be released according to the health certificate form for export of "meat and meat products" and the health certificate form for export of "table eggs and egg products" currently used, provided that the competent authorities in Belgium should send a health statement saying that the imported product(s) from areas where Highly Pathogenic Avian Influenza virus (HPAI) has not

been registered within a radius of 25 km around the farm/slaughterhouse/packing establishment the source of the products on at least for a period of not less than (28) days before production, and all necessary precautions have been taken to prevent the consignment from being in contact with any source of Highly Pathogenic Avian Influenza virus (HPAI). This is to be done temporarily until the approval of the health certificate forms is completed between the two countries;5) Continue to allow the importation of heat-treated poultry products (treated meat and treated egg products) from all provinces in Belgium.
