The Draft of the Regulations for the Importation of Objects Subject to Animal Quarantine

The draft of the regulations includes related quarantine requirements relating to foreign animal quarantine objects imported from trading partners, and so forth. There are 23 articles, which are amended and adjusted in accordance with the "Quarantine Requirements for the Importation of Animals and Animal Products", stating the reasons for drafting the regulations that are to define importing animals and their products subject to animal quarantine, clarify the quarantine requirements prior to export, elaborate application procedures on arrival, including veterinary certificates and other relevant documents required for the application, and quarantine measures of post-entry based on risk assessments. In addition, 53 draft amendments of quarantine requirements are attached to the articles, which elaborate on the details regarding the diseases status, diagnostic tests of certain animal infectious diseases, criteria of processing procedures, content of veterinary certificates, etc., required by the central competent authority and import/export animal quarantine authority prior to export. Accordingly, the body of the drafted regulation is similar to the "Quarantine Requirements for the Importation of Animals and Animal Products", and the order of its attachments has been rearranged without significant amendments of substantive contents or new requirements.

Proposed Amendments to the Regulation on Declaration and Inspection for Imported Livestock Products

The main proposed amendments are as follows:- regulating detailed procedures, such as the contents of the notification from the Ministry of Food and Drug Safety (MFDS) and the time frames of the submission of the result of the cause investigation and corrective actions from an exporting country in the cases where MFDS requests the government of the exporting country to make corrections on a foreign establishment in which hazard has been found at the border inspections in Korea, stipulating necessary measures taken by MFDS if the exporting country does not provide requested information or its corrective actions are not appropriate; - increasing the frequency of an on-site inspection up to five consecutive times for the same livestock products from the same establishment when non-compliance in total consignment is identified at the on-site inspection; - expanding the range of information to be disclosed, such as inspection items when standards and specifications are newly established or reinforced.
